1. Introduction

1.1   Citation styles

These are the different citation styles for author-year.

The standard \cite command produces the following output: Clarke 1990.

The \textcite command produces the following output: Clarke (1990).

The \parencite command produces the following output: (Clarke 1990).

The \footcite command produces a footnote citation[1].
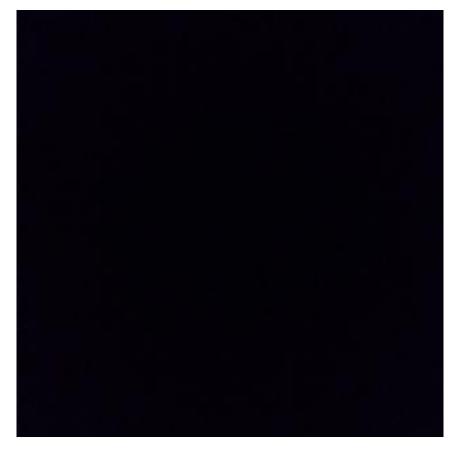

---

[1]Clarke 1990.

Figure 1.1: This is a black box

1.2 Figures

Always prefer to float figures to the top of the page using the [t] option in the figure environment.

1.3   Tables

Use vertical lines sparingly in tables. They're unnecessary bloat. Write the code for tables in a separate tex file, and include it in when required. Also preferrably use sans serif font for tables (because of their information density) using
`sffamily` in table definition.

Spam	Ni	Swallow	Shrubbery
A	1	2	3
E	3	4	5
C	6	9	3
M	4	1	1
